Regional Institute of Education (N.C.E.R.T)
Bhubaneswar

Professor D.R. Goel
Former Dean, Faculty of Education and Psychology
M.S. University Baroda
Sayaji Ganj, Vadodara

Overview

In present situation of countrywide lockdown due to pandemic COVID-19, e-Learning has been emerging as boon for educational institutions for imparting education. Undoubtedly, proper integration of content, technology and pedagogy in e-Learning leads to quality and productive education. In NCF-2005, it is clearly stated that judicious use of technology can increase the reach of educational programs, facilitate management of the system, as well as help to address specific learning needs and requirements, which is only possible by having integration between content, technological and pedagogical knowledge and skills. But in general, we witness during its implementation, that we use content and technology without knowing effective pedagogy. For effective education techno-pedagogical skills are essentially required. With this background, School of Education, Mahatma Gandhi Central University, East Champaran, Bihar is organizing this much needed webinar. The objective of this one-day webinar is to understand the different dimensions of techno-pedagogical skills and to enable the students, research scholars and teachers to apply it in educational process for enriching the learning outcomes.
